👤 Profile

Aspiring Mern stack web developer, with experiences working with React.JS, Next.Js, Node.js, Express.JS, MongoDB, etc. Curious to learn & have the capability to adapt to the latest web technologies. Also developed a deep understanding of the start-up ecosystem. Looking forward to starting a career as a web developer and making a significant contribution to an organization through dedicated effort & time.

📁 Projects

Ecom ↗

A e-commerce website, clone of flipkart domain. Where users can access different garments products through Searching, Sorting, Filtering. Pagination & Authentication is also there. Fully production grade responsive for mobile, tablet & PC. Upto (320px)

GitHub Link ↗

- **Features :** Responsive Design | CRUD Operation
- **Tech stack used :** React.js | React Router Dom | Node.js | Chakra UI | Tailwind CSS | JSON Server
- **Areas of Responsibility :** Backend & Frontend Both
- **Individual Project** accomplished by myself & executed in 14 days.

Note Taking Web-App ↗

A note taking system, admin can assign task, create user & do crud operation with lower post roles.

GitHub Link ↗

- **Features :** JWT Authentication | Role-Based Authentication | State management with Redux Toolkit | MVC Backend Structure | Production Grade Front-End Structure | Responsive UI
- **Tech stack used :** MongoDB & mongoose | express.js | React & Redux | Node.Js | JWT | bcrypt | Chakra-UI
- **Areas of Responsibility :** Backend & Frontend Both
- **Individual Project** accomplished by myself & executed in 20 days
